

Soil Map—Franklin County, North Carolina, and Warren County, North Carolina  
(TIM & GAIL SELLERS TRACT)

Map Scale: 1:7,920 if printed on A portrait (8.5" x 11") sheet.

## MAP LEGEND

### Area of Interest (AOI)

 Area of Interest (AOI)

### Soils

 Soil Map Unit Polygons

 Soil Map Unit Lines

 Soil Map Unit Points

### Special Point Features

Blowout

Borrow Pit

Clay Spot

Closed Depression

Gravel Pit

Gravelly Spot

Landfill

Lava Flow

Marsh or swamp

Mine or Quarry

Miscellaneous Water

Perennial Water

Rock Outcrop

Saline Spot

Sandy Spot

Severely Eroded Spot

Sinkhole

Slide or Slip

Sodic Spot

Spoil Area

Stony Spot

Very Stony Spot

Wet Spot

Other

Special Line Features

### Water Features

Streams and Canals

### Transportation

Rails

Interstate Highways

US Routes

Major Roads

Local Roads

### Background

Aerial Photography

## MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service  
Web Soil Survey URL: <http://websoilsurvey.nrcs.usda.gov>  
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Franklin County, North Carolina  
Survey Area Data: Version 15, Sep 10, 2014

Soil Survey Area: Warren County, North Carolina  
Survey Area Data: Version 11, Sep 10, 2014

Your area of interest (AOI) includes more than one soil survey area. These survey areas may have been mapped at different scales, with a different land use in mind, at different times, or at different levels of detail. This may result in map unit symbols, soil properties, and interpretations that do not completely agree across soil survey area boundaries.

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 10, 2010—Apr 4, 2011

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

## Map Unit Legend

| Franklin County, North Carolina (NC069) |  |              |                |
|---|--|--------------|----------------|
| Map Unit Symbol                         | Map Unit Name  | Acres in AOI | Percent of AOI |
| ChA                                     | Chewacla and Wehadkee soils,<br>0 to 3 percent slopes,<br>frequently flooded | 0.3          | 0.4%           |
| <b>Subtotals for Soil Survey Area</b>   |  | <b>0.3</b>   | <b>0.4%</b>    |
| <b>Totals for Area of Interest</b>      |  | <b>94.2</b>  | <b>100.0%</b>  |

| Warren County, North Carolina (NC185) |  |              |                |
|---------------------------------------|--|--------------|----------------|
| Map Unit Symbol                       | Map Unit Name  | Acres in AOI | Percent of AOI |
| AaA                                   | Altavista fine sandy loam, 0 to 3<br>percent slopes, rarely flooded          | 3.6          | 3.8%           |
| CeB                                   | Cecil sandy loam, 2 to 8 percent<br>slopes                                   | 52.0         | 55.1%          |
| ChA                                   | Chewacla and Wehadkee soils,<br>0 to 2 percent slopes,<br>frequently flooded | 2.3          | 2.5%           |
| PhC                                   | Pacolet sandy loam, 8 to 15<br>percent slopes                                | 36.1         | 38.3%          |
